25X1A9a

MEMORANDUM FOR: [REDACTED]

25X1A

SUBJECT: Saturday Morning Meeting on [REDACTED]

25X1A9a

REFERENCE: 25X1A9a (a) Truscott paper submitting [REDACTED] Plan for  
25X1A6a [REDACTED]

(b) Cable on Laboratories [REDACTED]  
25X1A9a

25X1A

PRESENT: [REDACTED] Dr. Chadwell, Mr. Douglass, Dr. Millikan,  
25X1A9a [REDACTED] Mr. Reber

1. The following agreements were reached:

25X1A9a  
25X1A6a

a. That unless there were extraordinary reasons from the CIA Headquarters' viewpoint it would be unwise and probably ineffectual to attempt to indicate to [REDACTED] the precise relationship to him of either [REDACTED] that as a matter of fact he would undoubtedly use the economic staff in an advisory capacity comparable to the way in which he now uses [REDACTED] as Head of the Scientific Division, namely, as his right-hand man on matters of scientific coordination.

25X1A9a

b. That rather than send economic specialists over for a year they should go for the regular two years and that Millikan should, as necessary, call them back earlier (this would avoid ill-feeling on the part of those who had to go for two years).

25X1A9a

c. That the [REDACTED] in question did not call for approval of the recommendations since most of them were manageable by [REDACTED] 5X1A9a under his coordinating or Senior Representative authority and that only the question of funds and personnel require approval.

2. While the question of providing laboratories for [REDACTED] was raised no action was taken on it.

25X1A9a

3. [REDACTED] was assigned the task of preparing a paper for General Smith.

NOTE: After the meeting in discussion with O/RR and O/SI it became clear that for action purposes the economic and scientific questions are separable. Millikan has agreed that he should prepare a

cable to [REDACTED] sounding him out on his proposed economic staff (there being today no T/O for such staff and no topside approval in the Agency in principle or as a project). A response to [REDACTED] 25X1A9a scientific paper is being handled separately. O/SI will consult with 0/SO on what action should be taken on laboratories [REDACTED] 25X1A
